AIRCONDITIONING PRODUCTS

If you are seeking more control of your ducted system's zones without having to replace all your controllers, then ZoneTouch may be the best option. The air conditioning manufacturer's controller remains controlling the air conditioning unit and replaces just the zone controller with a ZoneTouch.

Control your climate and control your energy

By using the ZoneTouch to turn off the air in areas of your home that are not being used, the reduced area being conditioned will reach the desired comfort level much quicker and be much easier for your air conditioner to maintain.

The big benefit is that by reducing the area you are cooling or heating, you also reduce the load on your air conditioner. So with proper zoning using the ZoneTouch and with proper use, you could receive worthwhile reductions in the amount of energy your system consumes.

With ZoneTouch you can be comfortable and have a power bill that can be a pleasant surprise.

Control the climate in your home when and where you need it most

The ZoneTouch gives you complete control over the amount of air conditioning provided to all the areas of your home. Turn areas on and off as needed, and when you need them, but also control the volume of air delivered into each area.

One of the great features of the ZoneTouch is the TURBO function which allows you to direct most of the air to one particular area whilst not depriving other vital areas of air conditioning. So while you are enjoying the company of your friends in perfect comfort in your living room, your children can still sleep comfortably in their bedrooms.

Note: the ZoneTouch will replace your existing zone switch controller only. As its dimensions may differ from the existing controller there may be painting and make good required to the wall. We shall patch any holes but any painting or make good is by owner.

Advancing technologies are everywhere around us, making our lives easier.

Air conditioning is no exception,
but you need not invest in a whole new
ducted system to enjoy the latest in
air conditioning controls.

Ford & Doonan now offer clients the
opportunity to simply do away with
the old and enjoy the latest, at a fraction
of the cost of a complete new system.
Replace those old and less efficient controls
in a simple two hour upgrade service.

WiFi control

Complete AC
system operation
and settings
from your
phone

Air flow control

Regulate the airflow
(and the
temperature)
of every zone
in your home

Home automation hub

The controller does far
more than control the
AC. It is also a fully
functional Android
tablet forming the hub
of home automation

8" large LCD touch screen

Easy to use,
easy to see

Multiple controllers

Add a second
touch screen

Multiple air conditioners

Control up to four
ducted systems
from a single
controller

Ventilation settings

Set minimum air flow
for any closed
zone set split or
bypass zones

Advanced timer functions

More advanced
and easy
to use
timer functions

Google and Alexia Control

Voice your
AC commands and
let the AirTouch
do the rest

Remote software updates

Always be using the
latest firmware with
the in-built automatic
software updates

AIRCONDITIONING PRODUCTS

The *AirTouch 4* replaces the main air conditioning system controller and the zone controller,
for less clutter on the wall.*

Compatible controllers

The following zone controllers are compatible with the new *AirTouch 4*.

• Zonemaster

• ZoneSwitch

• ZoneTouch

• AirTouch and AirTouch 2

The following air conditioning models are compatible with the new *AirTouch 4*:

DAIKIN model numbers beginning with "F" (eg FDX08, FDYQ125, FBYN140)

Panasonic model numbers beginning with "S" (eg S-125)

What model do I have? Go to your air conditioner's outdoor unit and find the manufacturer data label located
on the right side of the unit.

*As one controller is being added, the wall will require painting to cover the old fixings. Ford & Doonan will patch the wall only.
All painting and making good is by owner.
